

InstaCheck Counterfeit Detector

Easy and instant currency authentication

The Cassida InstaCheck immediately indicates whether the money you've taken is legitimate currency. A green light signals good currency; a red light and multiple beeps tell you the bill is suspect. InstaCheck offers the latest infrared and magnetic ink counterfeit detectors, giving you peace of mind and confidence in your cash handling.

Instant currency verification

The InstaCheck gives you immediate, easy-to-understand currency verification with its simple pass/fail indicator lights. A green pass light and audible beep means the currency is legitimate. A flashing red fail light and audible beeps tell you the bill is suspect.

Multi detection for accuracy

The InstaCheck utilizes state-of-the-art infrared (IR) and magnetic (MG) sensors for advanced currency detection.

Works with all U.S. denominations

The InstaCheck is sized specifically to take U.S. dollars, so feeding bills is easy and assures fewer dimension errors than other similar detectors.

A must-have for every cash-handling situation

Developed for retailers and cash handlers who need immediate currency verifications, the InstaCheck is a reliable way to authenticate currency in under a second.

If you've been searching for the easiest way for your team to know immediately whether the U.S. bill they took is authentic, the Cassida InstaCheck gives them instant, easy-to-understand feedback about the legitimacy of the currency.
