

SmartCheck™ Counterfeit Detector

Detect Counterfeit Bills Quickly

The Cassida SmartCheck™ counterfeit detector is not only the smallest desktop detector on the market, it is a versatile tool designed to authenticate bills quickly and easily. To check for counterfeits, just swipe the bill and the detector will beep if it is suspect. No training, and no more hassles searching for a UV security thread.

▪ Verify driver's licenses, credit cards, and more

Built-in ultraviolet illumination can be used to verify many forms of identification quickly and easily, including checks, credit cards, driver's licenses, and passports.

▪ Works with foreign currencies

The Smartcheck detects counterfeit bills in foreign currencies such as Euros, Pesos, and most other currencies. There is no need to change settings or have separate machines for different currencies.

▪ Dual detection security

In addition to automatic swipe test (verification) suspect bills can be visually checked for security thread using the UV illumination.

▪ Small and lightweight

The Cassida SmartCheck is about 6.5" x 4" x 3" and weighs just 12 oz, making it an easy device to keep at registers, desks, and office counters.

Audible alert for counterfeit bills

Built-in UV verifier

Smallest footprint of any desktop UV detector

Product Specs

Size:	6.5" w x 4" d x 3" h
Power Input:	100-240 VAC 60Hz (see box)
Power Consumption:	<20W
